DESCRIPTION

Auction with high-quality systems for sustainable energy.

Home Batteries and Inverters – Efficient storage for self-generated solar energy, various capacities available. Suitable for both residential and commercial applications
 Complete ESS systems – Advanced energy storage systems for maximum self-sufficiency and energy savings

FREE DELIVERY throughout Belgium, the Netherlands and Luxembourg! (except the Wadden Islands)

International bidders can pick up their lots by appointment or have them delivered for an additional fee

START

30 june 2025 to 08:00 [UTC]

END DATE

15 july 2025 from 17:30 [UTC]

VIEWING

- Only by appointment through the organizer.
 Monday July 07 2025 from 09:00 until 11:00

	Item	Description	Start price
	1	<p>Quantity: 1x Product category: Brand: Seplos Model: Home battery 16.5Kwh - Standing Additional information: Consisting of a Seplos Home battery 16.5 kWh</p> <p>With this battery you use your stored energy when you need it. By smartly storing energy and returning it, you can not only save on your energy bill, you can even earn money with it. The battery can be charged with electricity from solar panels or if you do not have solar panels, this battery can be charged with negative energy prices. The battery is large enough to supply an entire household with electricity and can also act as a reliable backup if the electricity grid fails. Condition of the entire system: new and comes with a 10-year warranty on capacity loss. If it has less than 70% within 10 years, you will receive a new one from us.</p> <p>Battery specifications: Storage: 16.5 kWh Configuration: 1P16S Nominal voltage: 51.2v Nominal capacity: 330Ah Cutoff voltage: 41.6v Voltage range: 42v - 58.4v Charge / discharge: 165A Maximum charge discharge: 200A Weight: 113kg Dimensions: 817x412x267mm SOC range: 15-95% Cycles: 11000 Communication: CAN & RS485</p> <p>With active balancing circuit board to keep the battery in good condition and balanced. When the difference in the lowest and highest voltage cell is more than 50mv, it will start to balance all cells.</p>	1.700€

		Weight category: 100 to 250 kg Condition: New

	7	<p>Quantity: 1x Product category: Brand: Seplos Model: Home battery 16.5Kwh - with inverter - Standing Additional information: Complete system to store or trade your own energy. Consisting of a Seplos Home battery 16.5Kwh, Victron inverter Multiplus II 48/5000/70-35, Victron cerbox GX to control everything and a complete installation manual and all this with a 10-year warranty on the battery system and 5 years on all Victron equipment. With this system you use your stored energy when you need it. By smartly storing and returning energy, you can not only save on your energy bill, you can even earn money with it. The system can be used in combination with solar panels, but also with just mains power. If the grid fails, you can be sure that your equipment will still work. The battery can be charged with electricity from solar panels or if you do not have solar panels, this battery can be charged with negative energy prices. The system can be set up in such a way that you prefer your own consumption or want to trade on the energy market. The battery is large enough to supply an entire household with power and can also function as a reliable backup if the electricity grid fails. Condition of the entire system: new and comes</p>	2.500€

		<p>with a 10-year warranty on the battery and a 5-year warranty on the Victron equipment. This system works with all possible PV inverters. The multiplus delivers 4000 watts of continuous power to your devices and can charge the battery with a maximum of 70A 48V.</p> <p>Battery specifications: Storage: 16.5Kwh Configuration: 1P16S Nominal voltage: 51.2v Nominal capacity: 330Ah Cutoff voltage: 41.6v Voltage range: 42v – 58.4v Charge / discharge: 155A Maximum charge discharge: 200A Weight: 113kg Dimensions: 817x412x267mm SOC range: 15-95% Cycles: 11000 Communication: CAN & RS485</p> <p>With active balancing circuit board to keep the battery in good condition and balanced. 	9	<p>Quantity: 2x Product category: Brand: Seplos Model: Home batteries 16.5Kwh - with inverter - Standing Additional information: Complete system to store or trade your own energy. Consisting of 2 Seplos Home batteries 16.5Kwh, 1 Victron inverter Multiplus II 48/5000/70-35, Victron cerbox GX to control everything and a complete installation manual and all this with a 10-year warranty on the battery system and 5</p>	4.200€

years on all Victron equipment.
 With this system you use your stored energy when you need it. By smartly storing and returning energy, you can not only save on your energy bill, you can even earn money with it. The system can be used in combination with solar panels, but also with just mains power. If the grid fails, you can be sure that your equipment will still work.

The battery can be charged with electricity from solar panels or if you do not have solar panels, this battery can be charged with negative energy prices. The system can be set up in such a way that you prefer your own consumption or want to trade on the energy market.

The battery is large enough to supply an entire household with power and can also function as a reliable backup if the electricity grid fails.

Condition of the entire system: new and comes with a 10-year warranty on the battery and a 5-year warranty on the Victron equipment.

This system works with all possible PV inverters. The multiplus delivers 4000 watts of continuous power to your devices and can charge the battery with a maximum of 70A 48V.

Specifications per battery:

Storage: 16.5Kwh

Configuration: 1P16S

Nominal voltage: 51.2v

Nominal capacity: 330Ah

Cutoff voltage: 41.6v

Voltage range: 42v – 58.4v

Charge / discharge: 155A

Maximum charge discharge: 200A

Weight: 113kg

Dimensions: 817x412x267mm

SOC range: 15-95%

Cycles: 11000

Communication: CAN & RS485

With active balancing circuit board to keep the battery in good condition and balanced. When the difference in the lowest and highest voltage cell is more than 50mv, it will start to balance all cells.

		Weight category: 100 to 250 kg Condition: New	
	11	<p>Quantity: 3x Product category: Brand: Seplos Model: Home batteries 16.5Kwh - with inverter - Standing Additional information: Complete system to store or trade your own energy. The battery is large enough to supply an entire household with power and can also function as a reliable backup if the electricity grid fails. Condition of the entire system: new and comes with a 10-year warranty on the battery and a 5-year warranty on the Victron equipment. This system works with all possible PV inverters. The multiplus delivers 4000 watts of continuous power to your devices and can charge the battery with a maximum of 70A 48V.</p> <p>Specifications per battery:</p>	5.900€

		<p>Storage: 16.5Kwh Configuration: 1P16S Nominal voltage: 51.2v Nominal capacity: 330Ah Cutoff voltage: 41.6v Voltage range: 42v – 58.4v Charge / discharge: 155A Maximum charge discharge: 200A Weight: 113kg Dimensions: 817x412x267mm SOC range: 15-95% Cycles: 11000 Communication: CAN & RS485</p> <p>With active balancing circuit board to keep the battery in good condition and balanced. When the difference in the lowest and highest voltage cell is more than 50mv, it will start to balance all cells.</p> <p>Weight category: 100 to 250 kg Condition: New</p>	
	13	<p>Quantity: 1x Product category: Brand: Model: ESS system - 9KVA - battery 16.5Kwh Additional information: Consisting of a fully assembled ESS system from Victron 3 phase 9KVA power with a Seplos Home battery 16.89 kWh</p> <p>The advantage of this set is that it is plug and play, you only have to connect power cables to it. The Victron Energy Storage System (ESS) is an energy storage system that is intended for self-consumption of generated energy or trading in this energy. Together with solar panels, it can serve as an energy backup system in the event of a power failure from the grid. Or to reduce your connection so that you pay less fixed fees. It also stores excess solar energy in the batteries so that your inverters continue to work despite the grid being overloaded.</p>	5.100€

Optimal use of solar power:
 When more solar power is generated than consumed, the excess energy is stored in batteries. This stored energy can then be used when there is insufficient solar power available, for example when it is cloudy or during night hours. You can also fully charge your batteries when the price is very low, often at night, to enjoy cheap power the next day.

Pay less with a smaller home connection:
 With this system it is possible to apply peak shaving to the existing home connections. In the Netherlands we have fixed costs that you pay according to the size of the connection, this can be 1x 35A or 3x 25A 3x35 3x40 or 3x50. If you were to switch from the standard 3x 25A connection to a 3x35A, you would pay 1200 euros more per year! With this system you can reduce all power to 3x 25A so that you always pay the lowest fixed costs.

Backup in case of power failure:
 The stored energy can also be used if the grid connection fails, for example due to a cable break in the street or a regional or even national outage. Depending on the battery capacity, it is determined how much energy can be used for later moments. The switchover takes place in milliseconds and is fully automatic, so that you do not notice anything. During planned maintenance, the system can be set to fully charge the batteries so that if the power fails, you can use this power immediately. The entire home is simply supplied with energy during the maintenance.

Battery:
 The battery is large enough to supply an entire household with power and can also function as a reliable backup if the electricity grid fails.
 Condition of the entire system: new and comes with a 10-year warranty on capacity loss. If this has less than 70% within 10 years, we will provide you with a new one.

		<p>Specifications Battery system:</p> <p>Storage: 16.89 kWh Configuration: 1P16S Nominal voltage: 51.2v Nominal capacity: 330Ah Cutoff voltage: 41.6v Voltage range: 42v - 58.4v Charge / discharge: 155A Maximum charge discharge: 200A Weight: 113kg Dimensions: 817x412x267mm SOC range: 15-95% Cycles: 11000 Communication: CAN & RS485</p> <p>With active balancing circuit board to keep the battery in good condition and balanced. Quantity: 1x

Product category:

Brand:

Model: ESS 8kVa 1 Phase - 6.4kW inverter power - 16.5kWh battery capacity

Additional information: Victron ESS 8kVa 1 phase, 6.4kW inverter power, 16.5kWh battery capacity

This set consists of the following parts:

- 1x LFP battery 16.5kWh >10,000 cycles total 16.5kWh battery capacity
- Multiplus 8000
- Cerbo GX mk2
- Energy Meter 3 phase
- Victron busbar and megafuse with associated fuses
- Battery cables with m8 eyes
- Earth wire
- Communication cables

You can build the system yourself after purchase, we provide an installation manual.

The system is designed in such a way that it can always be expanded to a 3-phase system or with multiple batteries.

The total inverter capacity is 6.4kW (6400W) and a battery capacity of 16.5kWh.

The system comes with a 5-year warranty on the Victron equipment and a 10-year warranty on the batteries.

The system works with all PV systems

Trading on the energy market is possible with this system.

For more information and specifications, see attachments:

Quantity: 1x

Product category:

Brand:

Model: ESS 24kVa 3 phase - 19.2kW inverter power - 16.5kWh battery capacity

Additional information: Victron ESS 24kVa 3 phase, 19.2kW inverter power, 16.5kWh battery capacity

8.200€

This set consists of the following parts:

- 1x LFP battery 16.5kWh >10,000 cycles
- Fully assembled Victron system PLUG and PLAY (3x multiplus 8000)
- Energy meter 3 phase for controlling current trading
- Shunt
- Machines
- Busbars
- Battery cable set 1 meter m8 eye
- Works with dynamic current contracts

The total inverter power is 19.2kW (19200W) and a battery capacity of 16.5kWh.

The system comes with a 5-year warranty on the Victron equipment and a 10-year warranty on the batteries.

The system works with all PV systems

Trading on the energy market is possible with this system.
