COMPLETE HOME BATTERY SYSTEMS

DESCRIPTION	<p>Auction featuring high-quality energy storage systems</p> <p>Home Batteries and Inverters – Efficient storage for self-generated solar energy, available in various capacities. Suitable for both residential and commercial applications.</p> <p>Complete Systems – Advanced energy storage systems for maximum self-sufficiency and energy savings.</p> <p>FREE DELIVERY throughout Belgium, the Netherlands, and Luxembourg! (except the Wadden Islands)</p> <p>International bidders can collect their lots by appointment or have them delivered for an additional fee.</p>
START	13 november 2025 to 23:01 [UTC]

	1	<p>Quantity: 1x Product category:</p> <p>Brand: Victrion</p> <p>Model: Victron ESS 3kVa 1-phase (1x 3kVa), 2.4kW inverter power, 15kWh battery capacity Additional information: Victron ESS 3kVa 1-phase (1x 3kVa), 2.4kW inverter power, 15kWh battery capacity</p> <p>The Victron Energy Storage System (ESS) is an energy storage system designed for self-consumption of generated energy or trading this energy. Combined with solar panels, it can serve as an energy backup system in case of a grid outage. Or it can reduce your connection charge so you pay less fixed fees. It also stores excess solar energy in the batteries, allowing your inverters to continue operating even when the grid is overloaded. You can also choose to fully charge your batteries at a low rate and use this energy when rates are high, thus ensuring a low electricity rate.</p> <p>Powerful and reliable energy storage:</p> <p>With a 3kVa inverter capacity (1x 3kVa) and 15kWh of battery storage, this set provides sufficient energy for most residential and/or commercial applications.</p> <p>Power outages: The Victron ESS ensures that your PV system continues to operate, even during a power outage, allowing you to continue using solar energy.</p> <p>Dynamic contract with Dynamic ESS: Victron's Dynamic ESS is an automated home energy system focused on optimizing profits by intelligently responding to energy rates. This</p>	2.500€

system uses daily local electricity prices, energy provider fees, grid limitations, battery specifications, charge and consumption forecasts, and weather forecasts to optimize its actions. Dynamic ESS can manage and sell both self-generated energy and grid power, tailored to current dynamic rates.

This set consists of the following components:

- 1x LFP battery 15kWh >10,000 cycles
- 1x Multiplus 3000
- Cerbo GX
- Battery cables with M8 lugs
- Ground wire
- Communication cables

You can assemble the system yourself after purchase; we provide an installation manual.

The system is designed to be expandable to multiple batteries at any time.

The total inverter power is 2.4kW (2400W) and the battery capacity is 15kWh.

The system comes with a 5-year warranty on the Victron equipment and a 10-year warranty on the batteries.

The system is compatible with all PV systems.

Trading on the energy market is possible with this system.

Battery specifications:

Storage: 15 kWh

Configuration: 1P16S

Nominal voltage: 51.2V

Nominal capacity: 295Ah

Cutoff voltage: 40V

		<p>Voltage range: 40V - 57.6V</p> <p>Charge/discharge: 200A</p> <p>Maximum charge/discharge: 200A</p> <p>Weight: 113kg</p> <p>Dimensions: 817x412x267mm</p> <p>SOC range: 15-100%</p> <p>Cycles: 10,000</p> <p>Communication: CAN & RS485</p> <p>If you would like to receive information about this system, please contact us at info.yipz@auctim.nl</p> <p>Weight category: 100 to 250 kg</p> <p>Condition: New</p>	
	2	<p>Quantity: 1x</p> <p>Product category:</p> <p>Brand: Victrion</p> <p>Model: Victron ESS 5kVa 1-phase (1x 5kVa), 4kW inverter power, 15kWh battery capacity</p> <p>Additional information: Victron ESS 5kVa 1-phase (1x 5kVa), 4kW inverter power, 15kWh battery capacity</p> <p>The Victron Energy Storage System (ESS) is an energy storage system designed for self-consumption of generated energy or trading this energy. Combined with solar panels, it can serve as an energy backup system in case of a grid outage. Or it can reduce your connection charge so you pay less fixed fees. It also stores excess solar energy in the batteries, allowing your</p>	2.600€

inverters to continue operating even when the grid is overloaded. You can also choose to fully charge your batteries at a low rate and use this energy when rates are high, thus ensuring a low electricity price.

Powerful and reliable energy storage:

With a 5kVa inverter capacity (1x 5kVa) and 15kWh of battery storage, this set provides sufficient energy for most residential and/or commercial applications.

Power outages:

The Victron ESS ensures that your PV system continues to operate, even during a power outage, allowing you to continue using solar energy.

Dynamic contract with Dynamic ESS:

Victron's Dynamic ESS is an automated home energy system focused on optimizing profits by intelligently responding to energy rates. This system uses daily local electricity prices, energy provider fees, grid limitations, battery specifications, charge and consumption forecasts, and weather forecasts to optimize its actions. Dynamic ESS can manage and sell both self-generated energy and grid power, tailored to current dynamic rates.

This set includes the following components:

- 1x LFP battery 15kWh >10,000 cycles
- 1x Multiplus 5000
- Cerbo GX
- Battery cables with M8 lugs
- Ground wire
- Communication cables

You can assemble the system yourself after purchase; we provide an installation manual.

The system is designed to be expandable to multiple batteries at any time.

The total inverter power is 4kW (4000W) and the battery capacity is 15kWh.

The system comes with a 5-year warranty on the Victron equipment and a 10-year warranty on the batteries.

The system is compatible with all PV systems.

Trading on the energy market is possible with this system.

Battery specifications:

Storage: 15 kWh

Configuration: 1P16S

Nominal voltage: 51.2V

Nominal capacity: 295Ah

Cutoff voltage: 40V

Voltage range: 40V - 57.6V

Charge/discharge: 200A

Maximum charge/discharge: 200A

Weight: 113kg

Dimensions: 817x412x267mm

SOC range: 15-100%

Cycles: 10,000

Communication: CAN & RS485

If you would like more information about this system, please contact us at info.yipz@auctim.nl

Weight category: 100 to 250 kg

Condition: New

intelligently responding to energy rates. This system uses daily local electricity prices, energy provider fees, grid limitations, battery specifications, charge and consumption forecasts, and weather forecasts to optimize its actions. Dynamic ESS can manage and sell both self-generated energy and grid power, tailored to current dynamic rates.

This set includes the following components:

- 1x LFP battery 15kWh >10,000 cycles
- 1x Multiplus RS Solar 6000
- Cerbo GX
- Battery cables with M8 lugs
- Ground wire
- Communication cables

You can assemble the system yourself after purchase; we provide an installation manual.

This system also includes 2x 3kWp 450V MPPT trackers for connecting solar panels. The system is designed to be expandable to multiple batteries.

The total inverter power is 4.8kW (4800W) and the battery capacity is 15kWh.

The system comes with a 5-year warranty on the Victron equipment and a 10-year warranty on the batteries.

The system is compatible with all PV systems.

Trading on the energy market is possible with this system.

Battery specifications:

(3x 3kVa), 7.2kW inverter power, 30kWh battery capacity

The Victron Energy Storage System (ESS) is an energy storage system designed for self-consumption of generated energy or trading this energy. Combined with solar panels, it can serve as a backup system in case of grid outages. Or it can reduce your connection charge so you pay less fixed fees. It also stores excess solar energy in the batteries, allowing your inverters to continue operating even when the grid is overloaded. You can also choose to fully charge your batteries at a low rate and use this energy when rates are high, thus ensuring a low electricity rate.

Powerful and reliable energy storage:

With a 9kVa inverter capacity (3x 3kVa) and 30kWh of battery storage, this set provides sufficient energy for most residential and/or commercial applications.

Power outages:

The Victron ESS ensures that your PV system continues to operate, even during a power outage, allowing you to continue using solar energy.

Dynamic contract with Dynamic ESS:

Victron's Dynamic ESS is an automated home energy system focused on optimizing profits by intelligently responding to energy rates. This system uses daily local electricity prices, energy provider fees, grid limitations, battery specifications, charge and consumption forecasts, and weather forecasts to optimize its actions. Dynamic ESS can manage and sell both self-generated energy and grid power, tailored to current dynamic rates.

This set consists of the following components:

- 2x LFP batteries 15kWh >10,000 cycles
- 3x Multiplus 3000

- 2x Lynx busbars with corresponding fuses
- Cerbo GX
- Battery cables with M8 lugs
- Ground wire
- Communication cables

You can assemble the system yourself after purchase; we provide an installation manual.

The system is designed to be expandable to multiple batteries at any time.

The total inverter power is 7.2kW (7200W) and the battery capacity is 30kWh.

The system comes with a 5-year warranty on the Victron equipment and a 10-year warranty on the batteries.

The system is compatible with all PV systems.

Trading on the energy market is possible with this system.

Battery specifications:

Storage: 15 kWh

Configuration: 1P16S

Nominal voltage: 51.2V

Nominal capacity: 295Ah

Cutoff voltage: 40V

Voltage range: 40V – 57.6V

Charge/discharge: 200A

Maximum charge/discharge: 200A

Weight: 113kg

Dimensions: 817x412x267mm

		<p>SOC range: 15-100%</p> <p>Cycles: 10,000</p> <p>Communication: CAN & RS485</p> <p>If you would like more information about this system, please contact us at info.yipz@auctim.nl</p> <p>Weight category: 100 to 250 kg</p> <p>Condition: New</p>

so you pay less fixed fees. It also stores excess solar energy in the batteries, allowing your inverters to continue operating even when the grid is overloaded. You can also choose to fully charge your batteries at a low rate and use this energy when rates are high, thus ensuring a low electricity price.

Powerful and reliable energy storage:

With an inverter capacity of 24kVa (3x 8kVa) and 60kWh of battery storage, this set provides sufficient energy for most residential and/or commercial applications.

Power outages:

The Victron ESS ensures that your PV system continues to operate, even during a power outage, allowing you to continue using solar energy.

Dynamic contract with Dynamic ESS:

Victron's Dynamic ESS is an automated home energy system focused on profit optimization by intelligently responding to energy rates. This system uses daily local electricity prices, energy provider fees, grid limitations, battery specifications, charge and consumption forecasts, and weather forecasts to optimize its actions. Dynamic ESS can manage and sell both self-generated energy and grid power, tailored to current dynamic rates.

This set consists of the following components:

- 4x LFP batteries 15kWh >10,000 cycles
- 3x Multiplus 8000
- 2x Lynx busbars with corresponding fuses
- Cerbo GX
- Battery cables with M8 lugs
- Ground wire
- Communication cables

You can assemble the system yourself after purchase; we provide an installation manual.

The system is designed to be expandable to multiple batteries at any time.

The total inverter power is 19.2kW (19200W) and the battery capacity is 60kWh.

The system comes with a 5-year warranty on the Victron equipment and a 10-year warranty on the batteries.

The system is compatible with all PV systems.

Trading on the energy market is possible with this system.

Battery specifications:

Storage: 15 kWh

Configuration: 1P16S

Nominal voltage: 51.2V

Nominal capacity: 295Ah

Cutoff voltage: 40V

Voltage range: 40V - 57.6V

Charge/discharge: 200A

Maximum charge/discharge: 200A

Weight: 113kg

Dimensions: 817x412x267mm

SOC range: 15-100%

Cycles: 10,000

Communication: CAN & RS485

If you would like more information about this system, please contact us at info.yipz@auctim.nl

(3x 15kVa), 36kW inverter power, 60kWh battery capacity

The Victron Energy Storage System (ESS) is an energy storage system designed for self-consumption of generated energy or trading this energy. Combined with solar panels, it can serve as an energy backup system in case of a grid outage. Or it can reduce your connection charge so you pay less fixed fees. It also stores excess solar energy in the batteries, allowing your inverters to continue operating even when the grid is overloaded. You can also choose to fully charge your batteries at a low rate and use this energy when rates are high, thus ensuring a low electricity rate.

Powerful and reliable energy storage:

With an inverter capacity of 45kVa (3x 15kVa) and 60kWh of battery storage, this set provides sufficient energy for most residential and/or commercial applications.

Power outages:

The Victron ESS ensures that your PV system continues to operate, even during a power outage, allowing you to continue using solar energy.

Dynamic contract with Dynamic ESS:

Victron's Dynamic ESS is an automated home energy system focused on optimizing profits by intelligently responding to energy rates. This system uses daily local electricity prices, energy provider fees, grid limitations, battery specifications, charge and consumption forecasts, and weather forecasts to optimize its actions. Dynamic ESS can manage and sell both self-generated energy and grid power, tailored to current dynamic rates.

Zero-on-the-meter:

Through smart energy storage and distribution,

you can strive for a net-zero energy situation, where you generate as much energy as you consume.

This set consists of the following components:

- 4x LFP batteries 15kWh >10,000 cycles
- 3x Multiplus 15000
- 2x Lynx busbars with corresponding fuses
- Cerbo GX
- Battery cables with M8 lugs
- Earth wire
- Communication cables

You can assemble the system yourself after purchase; we provide installation instructions.

The system is designed to be expandable to multiple batteries at any time.

The total inverter power is 36kW (36000W) and the battery capacity is 60kWh.

The system comes with a 5-year warranty on the Victron equipment and a 10-year warranty on the batteries.

The system works with all PV systems.
This system allows trading on the energy market.

Combined with solar panels, it can serve as an energy backup system in case of a grid outage. Or it can reduce your connection charge so you pay less fixed fees. It also stores excess solar energy in the batteries, allowing your inverters to continue operating even when the grid is overloaded. You can also choose to fully charge your batteries at a low rate and use this energy when rates are high, thus ensuring a low electricity rate.</p>	12.550€

Powerful and reliable energy storage:

With a 45kVa inverter capacity (3x 15kVa) and 75kWh of battery storage, this set provides sufficient energy for most residential and/or commercial applications.

Power outages:

The Victron ESS ensures that your PV system continues to operate, even during a power outage, allowing you to continue using solar energy.

Dynamic contract with Dynamic ESS:

Victron's Dynamic ESS is an automated home energy system focused on profit optimization by intelligently responding to energy rates. This system uses daily local electricity prices, energy provider fees, grid limitations, battery specifications, charge and consumption forecasts, and weather forecasts to optimize its actions. Dynamic ESS can manage and sell both self-generated energy and grid power, tailored to current dynamic rates.

This set consists of the following components:

- 5x LFP batteries 15kWh >10,000 cycles
- 3x Multiplus 15000
- 3x Lynx busbars with corresponding fuses
- Cerbo GX
- Battery cables with M8 lugs
- Ground wire
- Communication cables

You can assemble the system yourself after purchase; we provide installation instructions.

The system is designed to be expandable to multiple batteries at any time.

The total inverter power is 36kW (36000W) and the battery capacity is 75kWh.

The system comes with a 5-year warranty on the

Victron equipment and a 10-year warranty on the batteries.

The system is compatible with all PV systems.

Trading on the energy market is possible with this system.

Battery specifications:

Storage: 15 kWh

Configuration: 1P16S

Nominal voltage: 51.2V

Nominal capacity: 295Ah

Cutoff voltage: 40V

Voltage range: 40V - 57.6V

Charge/discharge: 200A

Maximum charge/discharge: 200A

Weight: 113kg

Dimensions: 817x412x267mm

SOC range: 15-100%

Cycles: 10,000

Communication: CAN & RS485

If you would like more information about this system, please contact us at info.yipz@auctim.nl
